Description

The Enforcer EMH15 is a reentrant type loudspeaker, designed for one-way or two-way sound and communication systems. Sturdy, compact and all metal in construction, the EMH15 is ideal for outdoor use in industrial plants, transportation terminals and recreational areas.

The EMH15 has a variable impedance selector making it easier to switch the speaker power requirement to a 25V or 70V constant-voltage line. The mounting bracket makes installation fast and simple.
