

Features

- ◆ “Quik-Lok” Cam lock/dowel hardware
- ◆ Hardware hidden inside the rack - smooth outside
- ◆ 11/16 crystal finish black melamine
- ◆ T-mold edging
- ◆ Ships flat packed
- ◆ Includes all tools needed
- ◆ Caster kit and door options available

Applications

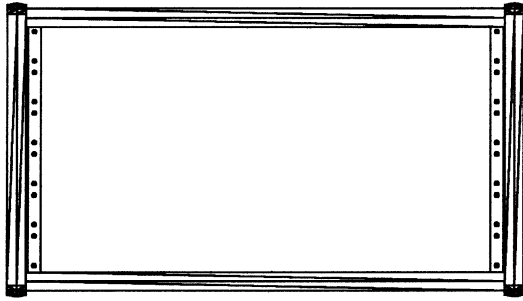

- ◆ Churches
- ◆ Boardrooms
- ◆ Retail stores
- ◆ Budget restrained installations

Description

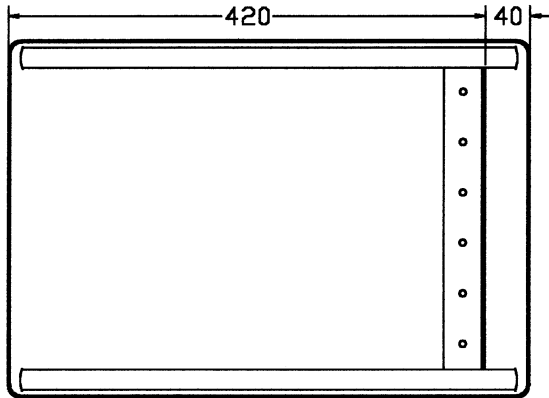

Enforcer’s LR racks are made from the highest quality 11/16” continuous press particle board core with crystal finished black melamine. A unique feature of these racks is the utilization of black T-mold edging on all exposed edges adding aesthetic and structural longevity. All racks come standard with 14 gauge 10-32 universal EIA hole spacing rack rail. All racks have provisions for the use of optional rear rack rail. The “Quik-Lok” hardware makes assembly twice as fast and easier than conventional, screw-together racks.
